This vessel must be manned with the following licensed and unlicensed Personnel. Included in which there must be 0 Certified Lifeboatmen, 0 Certified Tankermen, 0 HSC Type Rating, and 0 GMDSS Operators.

0 Licensed Mates 0 Masters 0 Chief Engineers 0 Oilers 0 Chief Mates 0 First Class Pilots 0 First Assistant Engineers

0 Second Mates 0 Radio Officers 0 Second Assistant Engineer **0 Third Mates** 0 Able Seamen 0 Third Assistant Engineers 0 Master First Class Pilot 0 Ordinary Seamen 0 Licensed Engineers

0 Mate First Class Pilots 0 Deckhands 0 Qualified Member Engineer

In addition, this vessel may carry 0 Passengers, 0 Other Persons in crew, 0 Persons in addition to crew, and no Others. Total Persons allowed: 0

Route Permitted And Conditions Of Operation:

---Lakes, Bays, and Sounds plus Limited Coastwise---

Also, in fair weather only, coastwise, not more than twelve (12) miles from shore between St. Marks and Carrabelle, Florida.

This vessel has been granted a fresh water service examination interval in accordance with 46 CFR 31.10-21(a) (2). If this vessel is operated in salt water more than six months in any twelve month period, the vessel must be inspected using salt water intervals per 46 CFR 31.10-21(a)(1) and the cognizant OCMI notified in writing as soon as this change in status occurs.

SEE NEXT PAGE FOR ADDITIONAL CERTIFICATE INFORMATION

With this Inspection for Certification having been completed at New Orleans, LA, UNITED STATES, the Officer in Charge, Marine Inspection, Sector New Orleans certified the vessel, in all respects, is in conformity with the applicable vessel inspection laws and the rules and regulations prescribed thereunder.

This certificate issued by:

Annual/Periodic/Re-Inspection

A/P/R V. COCHRAN COMMANDER, by direction Signature Zone Date FRANCIS TOSIP 4 OCT 2020 HOUSTON JAKE Officer in Charge, Marine Inspection JAKE FRANCIS OBNOVZOZI HOUSTON Sector New Orleans Ruben Montes 7-19-22 Houston Inspection Zone Michael W.JahnsonJr Corpus Christy TK

Certification Date: 10 Oct 2019 **Expiration Date:** 10 Oct 2024

Certificate of Inspection

Vessel Name: EBL 2980

This tank barge is participating in the Eighth-Ninth Coast Guard District's Tank Barge Streamlined Inspection Program (TBSIP). Inspection activities aboard this barge shall be conducted in accordance with its Tank Barge Action Plan. Inspection issues concerning this barge should be directed to New Orleans OCMI.

Tank Number	Max Cargo Weight per Tank (short	tons) Maximum Density (lbs/gal)
1 P/S	839	13.6
2 P/S	851	13.6
3 P/S	765	13.6

Loading Constraints - Stability

Hull Type	Maximum Load (short tons)	Maximum Draft (ft/in)	Max Density (lbs/gal)	Route Description
11	3804	10ft 0in	13.6	R, LBS, LC 0-12
Ш	4675	11ft 9in	13.6	R, LBS, LC 0-12

Conditions Of Carriage

Only those cargoes named in the vessel's Cargo Authority Attachment, Serial No. C1-1402633, dated August 08, 2014 may be carried and then only in the tanks indicated.

Per 46 CFR 150.130, the person in charge of the vessel is responsible for ensuring the compatibility requirements of 46 CFR 150 are met. Cargoes must be checked for compatibility using the figures, tables, and appendices of 46 CFR 150 in conjunction with the reactive group numbers from the "Compat Group No" column listed in the vessel's Cargo Authority Attachment.

The maximum design density of cargo which may be filled to the tank top is 8.74 lbs/gal. Cargoes with higher densities, up to 13.6 lbs/gal, may be carried as slack loads, but shall not exceed the tank weight limits as listed above.

Note: per 46 CFR 151.10-15 (c) (2) the maximum tank weights listed above reflect uniform (within 5%) loading at the deepest draft allowed. When carrying Subchapter "O" cargoes at shallower drafts, the barge should always be loaded uniformly.

Vapor Control Authorization

In accordance with 46 CFR Part 39, excluding part 39.4000, this vessel's vapor control system has been inspected to the plans approved by Marine Safety Center letter Serial No. C1-1801682, dated May 2018, and has been found acceptable for the collection of bulk liquid cargo vapors annotated with "Yes" in the vessel's Cargo Authority Attachment's (CAA's) VCS column. The VCS system has been approved with a pressure side 3.0 psig P/V valve with Coast Guard Approval 162.017/167/4. The cargo tank top is suitable for a maximum allowable working pressure (MAWP) of 3.50 psi.

United States of America Department of Homeland Security United States Coast Guard

Certification Date: 10 Oct 2019 Expiration Date: 10 Oct 2024

Certificate of Inspection

Vessel Name: EBL 2980

When the vessel is carrying cargoes containing 0.5% or more benzene by volume, the person in charge is responsible for ensuring the provisions of 46 CFR Part 197, subpart C are applied.

In accordance with 46 CFR Part 39.1017 and 39.5000(e) this vessel's VCS has been approved for multi-breasted tandem loading with other vessels specifically approved to tandem load with this vessel.

Explanation of terms & symbols used in the Table:

Cargo Identification

Chem Code

The proper shipping name as listed in 46 CFR Table 30.25-1, 46 CFR Table 151.05, and 46 CFR Part 153 Table 2. The three letter designation assigned to the cargo in the Chamical Hazards Response information System (CHRIS) Manual. Certain mixtures of cargoes may not have a CHRIS Code assigned.

лопе Compatability Group No.

The cargo reactive group number assigned for compatibility determinations in 46 CFR Part 160 Tables I and II. In accordance with 46 CFR 150,130, the Person-in-Charge of the barge is responsible for ensuring that the compatibility requirements of 45 CFR Part 150 are mst. Cargoes must be checked for compatibility using the figures, tables, and appendices of 46 CFR 150 in conjunction with the assigned reactive group number. Because of the very high reactive or runneaul conditions of cartiage or potential compatibility problems, this product is not sasigned to a specific group in the Compatibility Chart. For additional compatibility information, contact Commandant (CG-3PSO-3), U.S. Coast Guard, 2100 Second. Street, SW, Washington, DC. 20593-0001. Telephone

Note 2

See Appendix I to 46 CFR Part 160 - exceptions to the competability chart.

Subchapter D

Subchapter O Note 3

The subchapter in Title 46 Code of Federal Regulations under which the cargo has been classified.
Those flammable and combustible Roulde Isted in 46 CFR Table 30.25-1.
Those hazardous cargoes listed in 46 CFR Table 151.05 and 46 CFR Part 153 Table 2.
Those cargoes listed in 46 CFR Part 153 Table 2 are non-agulated cargoes when carried in bulk on non-oceangoing barges.

Subchapter

The cargo classification assigned to each flammable or combustible liquid. Grades inside of "(")" indicate a provisional assignment based upon literature sources which were not verified by manufacturers data and ensure that the barge is authorized for carriage of

at grade or cargo.

Firanmabile liquid cargoes, as defined in 46 CFR 30-10.22.

Combustible fiquid cargoes, as defined in 46 CFR 30-10.15.

The fiarmability/combustibity grade of these cargoes may very depending upon the fleshpoint and Reid vepor pressure. The Person-in-Charge shall verify the cargo grade based on Manufacturers data and ensure that the barge is authorized for carriage of that grade of cargo.

Those subchapter O cargoes which are not classified as a flammabile or combustible fiquid.

No flammability/combustibity grade has been assigned yet, as the necessary flash point/vapor pressure data for such assignments are presently not available.

NA # Hull Type

ÑA

The required berge hull classification for carriage of the specified Subchapter O hazardous material cargo, see 46 CFR 151.10-1.

Designed to carry products which require the maximum preventive measures to preclude the uncontrolled release of the cargo, See 46 CFR 151.10-1(b)(1).

Designed to carry products which require significant preventive measures to preclude the uncontrolled release of cargo. See 46 CFR 151.10-1(b)(3).

Designed to carry products of sufficient hazard to require amodinate degree of control. See 46 CFR 151.10-1(b)(4).

Not applicable to barges certificated under Subchapter D.

Conditions of Cerriage

Tank Group Vapor Recove Approved (Y or N)

The vessel's tank group (as defined in Section 4) which is authorized for carriage of the named cargo.

Yes: The vessel's VCS has been reviewed and approved by the MSC to control vapors of the specified cargo. No: The vessel's VCS has been reviewed and is not approved by the MSC to control vapors of the specified cargo.

Conditions of Carriage

Tank Group Vapor Recovery Approved (Y or N) The vassel's tank group (as defined under the "46 CFR Tenk Group Characteristics" listed on page 1) which is authorized for carriage of the named cargo.

Yes: The vessel's VCS has been reviewed and approved by the MSC to control vapors of the specified cargo. No: The vessel's VCS has been reviewed and is not approved by the MSC to control vapors of the specified cargo.

VCS Category: Category 1

The specified cargo's provintenal dessification for vapor control systems.

(No additional VCS requirements above those for bentame, gasolines and crude oil) All requirements applying to the handling of oil and hazardous meterials in Titles 33 and 48 Code of Federal Regulations (CFR) apply to these casgoes. Those specifically dealing with vapor control systems are in 33 CFR 155.750, 33 CFR 156.120, 33 CFR 156.170, 48 CFR 35.35 and 48 CFR 39. The cargo tank venting system calculations (46 CFR 39.20-11) and the pressure drop calculations (46 CFR 39.30-1(b))

must use appropriate friction factors, vapor densities and vapor growth rates.

Category 2

(Polymerizas) Polymerization and residue build-up of these cargoes can adversely affect the vessel by fouling safety componenets and restricting vapor flow which could lead to cargo tank overpressurization. The vessel's owner must develop a method of ensuring at VCS safety components are functional and polymer build-up is not causing an unuasis condition due to increased pressure in the vegor control plant cargo tanks. The method shall be acceptable to the local Officer in Charge, Mainte Inspection. This is in addition to the requirements of Category 1. Rease note that a metodel not normally considered a monomer can be a problem in detarution surester.

Category 3

(Highly toxic) VCSs for these toxic cargose cannot use a spill valve or rupture disk as the primary meens to meet the overfill protection requirement of 46 CFR 39.20-9. This requirement is in addition to the requirements of Category 1,

Category 4

(Polymerizes and highly tests) Must comply with requirements of Categories 1, 2 and 3.

Category 5

(High vapor pressure) VCS pressure drop calculations for cargoes with a vapor pressure greater than 14.7 pale at 115 F must take into account increased vapor-air mixture densities and vapor growth rates as compared to Category 1 cargoes. Consult the Marine Safety Center's VCS Guidelines for further information. This requirement is in addition to the requirements of Category 1.

Category 6 Category 7

(High vapor pressure and highly toxic) Must comply with requirements of Categories 1, 3 and 5. (High vapor pressure and polymerizes) Must comply with requirements of Categories 1, 2 and 5.

none

The cargo has not been evaluated/classified for use in vapor control systems.
