In addition, this vessel may carry 0 Passengers, 0 Other Persons in crew, 0 Persons in addition to crew, and no Others. Total Persons allowed: 0

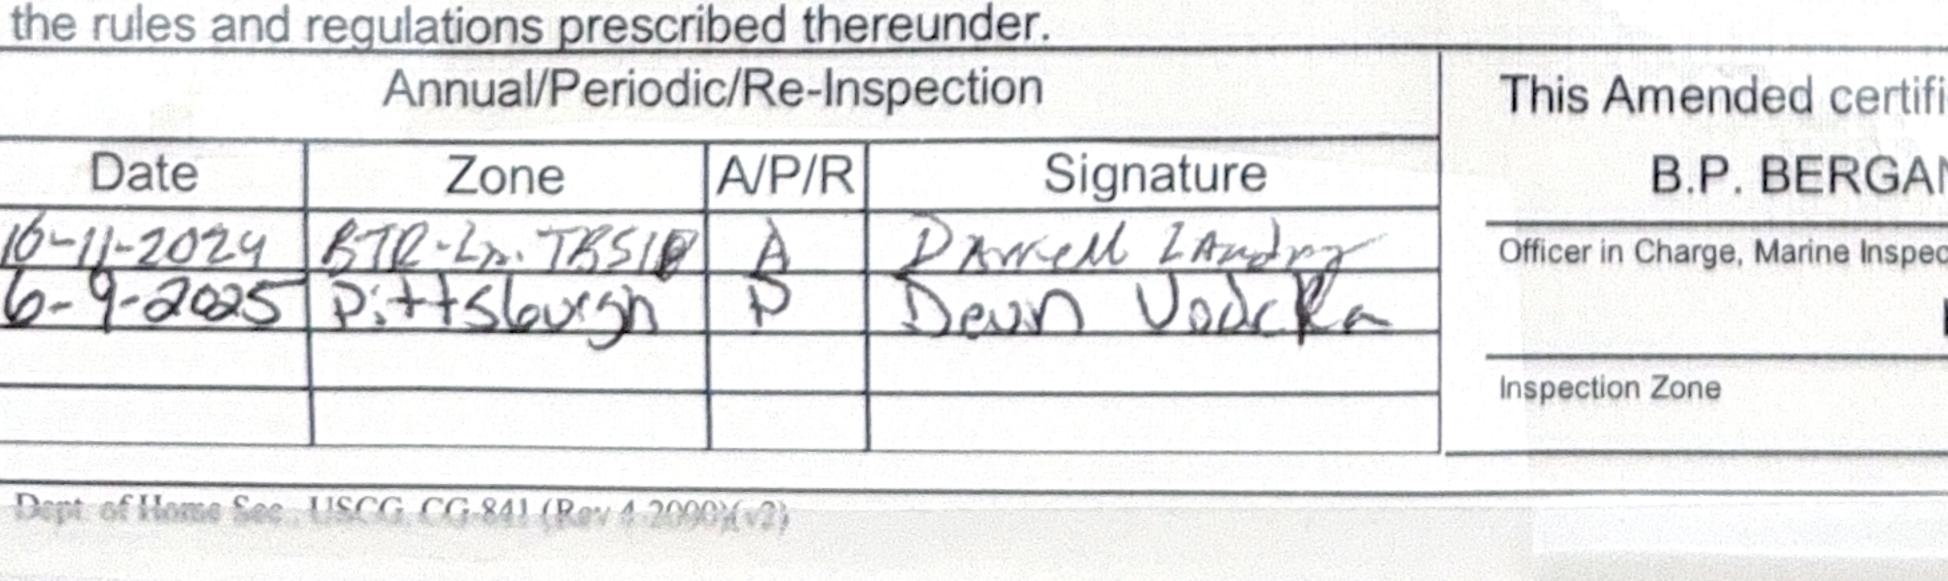

Route Permitted And Conditions Of Operation: ---Lakes, Bays, and Sounds---

Also, in fair weather only, not more than twelve (12) miles from shore between St. Marks and Carrabelle, Florida.

This vessel has been granted a fresh water service examination interval as per TABLE 46 CFR 31.10-21(a)(2). If this vessel is operated in salt water more than six (6) months in any twelve (12) month period, the vessel must be inspected using salt water intervals per 46 CFR 31.10-21(a)(1) and the cognizant OCMI must be notified in writing as soon as this change in status occurs.

SEE NEXT PAGE FOR ADDITIONAL CERTIFICATE INFORMATION

With this Inspection for Certification having been completed at Freeport, TX, UNITED STATES, the Officer in Charge, Marine Inspection, Houston-Galveston certified the vessel, in all respects, is in conformity with the applicable vessel inspection laws and

This Amended certificate issued by: 3.7. Bergan **B.P. BERGAN CDR, USCG, BY DIRECTION**

Officer in Charge, Marine Inspection

OMB No. 2115-0517

United States of America Department of Homeland Security United States Coast Guard

Certificate of Inspection

Vessel Name: KIRBY 10109

This tank barge is participating in the Eighth and Ninth Coast Guard District's Tank Barge Streamlined Inspection Program (TBSIP). Inspection activities aboard this barge shall be conducted in accordance with its Tank Barge Action Plan (TAP). Inspection issues concerning this barge should be directed to OCMI Houston-Galveston. ----Hull Exams----Exam Type Next Exam Last Exam Prior Exam DryDock 31Mar2024 18Mar2014 Internal Structure 30Apr2024 16Apr2019 18Mar2014 --- Liquid/Gas/Solid Cargo Authority/Conditions ---GRADE "A" AND LOWER AND SPECIFIED HAZARDOUS CARGOES Authorization: Highest Grade Type Part151 Regulated Part153 Regulated Part154 Regulated **Total Capacity** Units 10000 Barrels А Yes No No *Hazardous Bulk Solids Authority* Not Authorized *Loading Constraints - Structural* Tank Number Max Cargo Weight per Tank (short tons) Maximum Density (lbs/gal) 1 C/L 746 13.6 2 C/L 687 13.6 3 C/L 552 13.6 *Loading Constraints - Stability* Maximum Load Maximum Draft Max Density **Route Description** Hull Type (short tons) (ft/in) (lbs/gal) R, LBS, LC Ш 1893 11ft Oin 13.6 8ft 9in R, LBS, LC 1407 13.6 11

Conditions Of Carriage

Only those cargoes named in the vessel's Cargo Authority Attachment (CAA), serial #C1-1304363 dated 24-DEC-2013, may be carried and then only in the tanks indicated.

As per 46 CFR 150.130, the Person In Charge of the vessel is responsible for ensuring that the compatibility requirements of 46 CFR, Part 150, are met. Cargoes must be checked for compatibility using the figures, tables, and appendices of 46 CFR, Part 150, in conjunction with the reactive group numbers from the "Compat Group No" column listed in the vessel's Cargo Authority.

When the vessel is carrying cargoes containing greater than 0.5% benzene by volume, the person in charge is responsible for ensuring the provisions of 46 CFR Part 197, Subpart C are applicable.

In accordance with 46 CFR Part 39, excluding part 39.4000, this vessel's vapor collection system has been inspected to the plans approved by Marine Safety Center letter Serial No. C1-1304363 dated December 24, 2013, and has been found acceptable for the collection of bulk liquid cargo vapors annotated with "Yes" in the vessel's Cargo Authority Attachment's VCS column. The VCS System has been approved with a pressure side 6.0 psig P/V valve with Coast Guard Approval 162.017/167/04. The cargo tank top is suitable for a maximum allowable working pressure (MAWP) of 6.5 psi.

The maximum design density of cargo which may be filled to the tank top is 9.99 lbs/gal. Cargoes with higher densities, up to 13.6 lbs/gal, may be carried as slack loads, but shall not exceed the tank weight limits as listed above.

United States of America Department of Homeland Security United States Coast Guard

Certificate of Inspection

Vessel Name: KIRBY 10109

Per 46 CFR 151.10-15(c)(2) the max tank weights listed below reflect uniform (within 5%) loading at the deepest draft allowed. When carrying Subchapter O cargoes at shallower drafts, the barge(s) should always be loaded uniformly.

Shipyard: Trinity Caruther Hull #: 5998-21

Explanation of terms & symbols used in the Table:

Cargo Identification	The proper shipping name as listed in 48 CFR Table 30.25-1, 48 CFR Table 151.05, and 48 CFR Part 153 Table 2.
Name	The proper snapping name as initia in 40 CPH Table 3022-1, 40 CPH Table 15140, and 151
Chem Code none	Centain mixtures of careges may not have a CHRIS Code \$550780.
Compatability Group No.	The cargo reactive group number assigned for compatibility determinations in 48 CFR Part 150 Teblos I and II. In accordance with 48 CFR 150.130, the Person-In-Charge of the barge is responsible for ensuring that the compatibility requirements of 48 CFR Part 150 are met. Cargoes must be checked for compatibility using the figures, tables, and appendices of 46 CFR 150 in conjunction with the assigned reactive group number.
Note 1	and appendens of the very high reactives conditions of carriage or potential competibility problems, this product is not essigned to a specific group in the Compatibility Boccuse of the very high reactives conditions of carriage or potential competibility problems, this product is not essigned to a specific group in the Compatibility Chart. For additional competibility information, contact Commandant (CG-3PSO-3), U.S. Coast Guard, 2100 Second Street, SW, Washington, DC 20593-0001. Telephone
Note 2	(202) 372-1425. See Appendix I to 46 CFR Part 150 - exceptions to the compatability chart.
Subchapter Subchapter D Subchapter O Note 3	The subchapter in Title 48 Cade of Federal Regulations under which the cargo has been classified. These flammable and combustible liquids liated in 46 CFR Table 30.25-1. These hazardous cargoes listed in 46 CFR Table 151.05 and 46 CFR Part 153 Table 2. These cargoes listed in 46 CFR Part 163 Table 2 are non-regulated cargoes when carded in bulk on non-occangeing barges.
Grade	The cargo classification assigned to each flammable or combustible liquid. Grades inside of "()" indicate a provisional assignment based upon literature sources which were not verified by manufactures data. The Person-In-Charge shall verify the cargo grade based on Manufacturers data and ensure that the barge is authorized for carriage of that grade of cargo.
A, B, C	Rammable liquid cargoes, as defined in 49 CFR 30-10.22.
D, E Note 4	Combustible liquid cargoes, as defined in 46 CFR 30-10.15. The flammability/combustbility grade of these cargoes may vary depending upon the flashpoint and Reid vapor pressure. The Person-In-Charge shall varify the cargo grade based on Manufacturers data and ensure that the barge is authorized for cardisge of that grade of cargo.
NA	These subchanter O carooss which are not classified as a figurable or combustible liquid.
#	No flammability/combusibility grade has been assigned yet, as the necessary flash point/vapor pressure data for such assignments are presently not available.
Ни‼ Туре І	The required barge hull dessification for carriage of the specified Subchapter O hazardous material cargo, see 46 CFR 151.10-1. Designed to carry products which require the maximum preventive measures to predude the uncontrolled release of the cargo. See 46 CFR 151.10-1(b)(1).
0 01	Designed to carry products which require significant preventive measures to produce the uncontrolled release of cargo. See 48 CFR 151.10-1(b)(3). Designed to carry products of sufficient hazard to require a moderate degree of control. See 48 CFR 151.10-1(b)(4).
NA	Not applicable to barges contificated under Subchapter D.
Conditions of Carriage	
Tank Group	The vessel's tank group (as defined in Soction 4) which is authorized for carriage of the named carge.
Vapor Recovery Approved (Y or N)	Yes: The vessel's VCS has been reviewed and approved by the MSC to control vapors of the specified cargo. No: The vessel's VCS has been reviewed and is not approved by the MSC to control vapors of the specified cargo.
Conditions of Carriage	
Tank Group	The vossel's tank group (as defined under the "48 CFR Tank Group Characteristics" listed on page 1) which is authorized for carriage of the named cargo.
Vapor Recovery Approved (Y or N)	Yes: The vessel's VCS has been reviewed and approved by the MSC to control vapors of the specified cargo. No: The vessel's VCS has been reviewed and is not approved by the MSC to control vapors of the specified cargo.
VCS Category:	The specified targets provisional classification for vapor control systems.
Category 1	(No additional VCS requirements above those for benzene, gasofines and crude cit) All requirements applying to the handling of oil and hazardous materials in Titles 33 and 48 Cade of Faderal Requiritions (CFR) apply to these cargoes. These specifically dealing with vepor control systems are in 33 CFR 186,750, 33 CFR 186,120, 33 CFR 186,170, 48 CFR 35.35 and 48 CFR 39. The cargo tank venting system calculations (48 CFR 39.20-11) and the pressure drop calculations (46 CFR 39.30-1(b)) must use appropriate friction factors, vapor densities and vapor growth rates.
Calegory 2	(Polymerizes) Polymerization and residue build-up of these cargoes can adversely affect the vessel by fouring eafery components and restricting vapor flow which could lead to cargo tank overpressurization. The vessel's owner must develop a method of onsuring all VCB safety components are functional and polymer build-up is not causing an unsafe condition due to increased pressure in the vegor counter plang and arego tank. The method shall be acceptable to the local Officer in Charge, Marine Inspection. This is in addition to the requirements of Category 1. Please note that a material not normally considered a monomer can be a problem in detonation arrester.
Category 3	(Highly toxic) VCSs for these toxic cargoes cannot use a split valve or rupture disk as the primary means to meet the overfill protection requirement of 46 CFR 39.20-9. This requirement is in addition to the requirements of Category 1.
Category 4	(Polymerizes and highly lade) Must comply with requirements of Categories 1, 2 and 3.
Category 5	(High vapor pressure) VCS pressure drop calculations for cargoes with a vapor pressure greater than 14.7 psia at 115 F must take into account increased vapor-air mixture densities and vapor growth rates as compared to Category Icargoes. Consult the Marine Safety Contarts VCS Guidelines for further information. This requirement is in addition to the requirements of Category 1.
Calegory 6	(High vapor pressure and highly toxic) Must comply with requirements of Categories 1, 3 and 5.
Category 7	(High vapor pressure and polymerizes) Must comply with requirements of Celegories 1, 2 and 5.
0006	The cargo has not been evaluated/classified for use in vapor control systems.
