Certification Date: **Expiration Date:**

24 Apr 2020 24 Apr 2021

Temporary Certificate of Inspection

For ships on international voyages this certificate fulfills the requirements of SOLAS 74 as amended, regulation V/14, for a SAFE MANNING DOCUMENT.

This Temporary Certificate of Inspection is issued under the provision of Title 46 United States Code, Section 399 in lieu of the regular certificate of inspection, and shall be in force only until the receipt on board said vessel of the original certificate of inspection, this certificate in no case to be valid after one year from the date of inspection.

In addition, this vessel may carry 0 Passengers, 0 Other Persons in crew, 0 Persons in addition to crew, and no Others. Total Persons allowed: 0

Route Permitted And Conditions Of Operation:

--- Lakes, Bays, and Sounds plus Limited Coastwise---

Also, in fair weather only, coastwise, not more than twelve (12) miles from shore between St. Marks and

This vessel has been granted a fresh water service examination interval in accordance with 46 CFR 31.10-21(a) (2). If this vessel is operated in salt water more than six months in any twelve month period, the vessel must be inspected using salt water intervals per 46 CFR 31.10-21(a)(1) and the cognizant OCMI notified in writing as soon as this change in status occurs.

This tank barge is participating in the Eighth & Ninth Coast Guard District's Tank Barge Streamlined Inspection

SEE NEXT PAGE FOR ADDITIONAL CERTIFICATE INFORMATION

With this Inspection for Certification having been completed at Houston, TX, UNITED STATES, the Officer in Charge, Marine Inspection, Sector Houston-Galveston certified the vessel, in all respects, is in conformity with the applicable vessel inspection laws and the rules and regulations prescribed thereunder. Appual/Designatio/D-1

Conditions Of Carriage

Only those cargoes named in the vessel's Cargo Authority Attachment (CAA), serial #C1-1502226 dated May 19, 2015, may be carried and then only in the tanks indicated.

In accordance with 46 CFR, Part 39, excluding part 39.4000, this vessel's vapor control system has been inspected to the plans approved by Marine Safety Center letters Serial #C1-1500030 dated January 12, 2015, and found acceptable for collection of bulk liquid cargo vapors annotated with "Yes" in the CAA's VCS column. The VCS system has been approved with a pressure side 6 psig P/V valve with Coast Guard Approval 162.017/167/4. The cargo tank top is suitable for a maximum allowable working pressure (MAWP) of 6.5 psi. When the vessel is carrying cargoes containing 0.5% or more benzene by volume, the person in charge is responsible for ensuring the provisions of 46 CFR Part 197, subpart C are applied.

When the vessel is carrying cargoes containing greater than 0.5% benzene by volume, the person in charge is responsible for ensuring the provisions of 46 CFR Part 197, Subpart C are applicable.

As per 46 CFR 150.130, the Person In Charge of the vessel is responsible for ensuring that the compatibility requirements of 46 CFR, Part150, are met. Cargoes must be checked for compatibility using the figures, tables, and appendices of 46 CFR, Part 150, in conjunction with the reactive group numbers from the "Compat Group No" column listed in the vessel's Cargo Authority.

The maximum design density of cargo which may be filled to the tank top is 9.99 lbs/gal. Cargoes with higher densities, up to 13.58 lbs/gal, may be carried as slack loads, but shall not exceed the tank weight limits as listed above.

^{*}Vapor Control Authorization*

United States of America Department of Homeland Security United States Coast Guard

Certification Date: 24 Apr 2020 Expiration Date: 24 Apr 2021

Temporary Certificate of Inspection

Vessel Name: KIRBY 10444

Note: per 46 CFR 151.10-15 (c) (2) the maximum tank weights listed above reflect uniform (within 5%) loading at the deepest draft allowed. When carrying Subchapter "O" cargoes at shallower drafts, the barge should always be loaded uniformly.

In accordance with 46 CFR Part 39.1017 and 39.5000(e) this vessel's VCS has been approved for multi-breasted tandem loading with other vessels specifically approved to tandem load with this vessel.

Explanation of terms & symbols used in the Table:

Cargo Identification

none

Name Chem Code

The proper shipping name as listed in 46 CFR Table 30.25-1, 46 CFR Table 151.05, and 46 CFR Part 153 Table 2. The three latter designation assigned to the cargo in the Chemical Hazards Response Information System (CHRIS) Manusi Certain mixtures of cargoss may not have a CHRIS Code assigned.

Compatability Group I io.

The cargo reactive group number assigned for compatibility determinations in 46 CFR Part 150 Tables I and II. In accordance with 46 CFR 150.130, the Person-in-Charge of the barge is responsible for ensuring that the compatibility requirements of 46 CFR Part 150 are met. Cargoss must be checked for compatibility using the figures, tables, and appendices of 46 CFR 150 in conjunction with the assigned reactive group number.

Bocause of the very high reactivity or unusual conditions of cartage or potential compatibility problems, this product is not assigned to a specific group in the Compatibility Chart. For additional compatibility information, contact Commandent (CG-3PSO-3), U.S. Coast Guard, 2100 Second Street, SW, Westkington, DC 20593-0001. Telephone

Hote 1 Note 2

(202) 372-1425.

See Appendix I to 46 CFR Part 150 - exceptions to the competability chart

Subchapter Subchapter D Subchapter O The subchapter in Title 46 Code of Federal Regulations under which the cargo has been classified Those flammable and combustible figuids listed in 45 CFR Table 30.25-1.

Those hazardous cargoes listed in 46 CFR Table 151.05 and 48 CFR Part 153 Table 2.

Those cargoes listed in 46 CFR Part 163 Table 2 are non-regulated cargoes when carried in bulk on non-oceangoing barges.

Grada

The cargo classification assigned to each flammable or combustible figuid. Grades inside of "[]" indicate a provisional assignment based upon filterature sources which were not verified by manufacturers date. The Person-in-Charge shall verify the cargo grade based on Manufacturers date and ensure that the barge is authorized for carriage of Ihat grade of cargo.
Flammable liquid cargoes, as defined in 46 CFR 30-10.22

A, B, C D, E Noie 4

Combustible liquid cargoes, as defined in 46 CFR 30-10-18.

The flammability/combustibility grade of these cargoes may vary depending upon the flashpoint and Reid vapor pressure. The Person-in-Charge shall varily the cargo grade based on Manufacturers data and ensure that the barge is authorized for carriage of that grade of cargo.

Those subchapter O cargoes which are not classified as a flammable or combustible liquid.

No flammability/combustibility grade has been assigned yet, so the necessary flash point/vapor pressure data for such assignments are presently not available.

Hull Type

114

NA

The required barge hull classification for carriage of the specified Subchapter O hazardous malerial cargo, see 46 CFR 151.10-1. Designed to carry products which require the maximum preventive measures to preclude the uncontrolled release of the cargo. See 46 CFR 151.10-1(b)(1). Designed to carry products which require significant preventive measures to preclude the uncontrolled release of cargo. See 46 CFR 151.10-1(b)(3). Designed to carry products of sufficient heaven to require a moderate degree of control. See 46 CFR 151.10-1(b)(4). Hot applicable to barges certificated under Subchapter D.

Conditions of Carriage

Tank Group Vapor Recovery Approved (Y or H) The vessel's tank group (as defined in Section 4) which is authorized for carriage of the named cargo

Yes: The vessel's VCS has been reviewed and approved by the MSC to control vapors of the specified cargo. No: The vessel's VCS has been reviewed and is not approved by the MSC to control vapors of the specified cargo.

Conditions of Carriage

Tank Group Vapor Recove Approved (Y or N) The vessel's tank group (as defined under the "46 CFR Tank Group Characteristics" listed on page 1) which is authorized for carriage of the named cargo.

Yes: The vessel's VCS has been reviewed and approved by the MSC to control vapors of the specified cargo. No: The vessel's VCS has been reviewed and is not approved by the MSC to control vapors of the specified cargo.

VCS Category:

The specified cargo's provisional dessification for vapor control systems.

Calegory 1

(No additional VCS requirements above those for banzana, gasolines and crude oil) All requirements applying to the handling of oil and hazardous materials in Titles 33 and 46 Code of Federal Regulations (CFR) apply to these cargoes. Those specifically dealing with vapor control systems are in 33 CFR 155.750, 33 CFR 156.120, 33 CFR 166.170, 46 CFR 35.35 and 46 CFR 39. The cargo tank venting system calculations (46 CFR 39.20-11) and the pressure drop calculations (46 CFR 39.30-1(b)) must use appropriate iniction factors, vapor densities and vapor growth rates.

Category 2

(Polymerizas) Polymerization and residus build-up of these cargoes can adversely affect the vessel by fouling safety components and residus build-up of these cargoes can adversely affect the vessel's components are functional and polymer build-up it not lead to cargo tank overpressurization. The vessel's owner must develop a method of ensuring all VCS safety components are functional and polymer build-up it not causing an unsafe condition due to increased pressure in the vapor control piping and cargo tanks. The method shall be acceptable to the local Officer in Chargo, Marins inspection. This is in addition to the requirements of Category 1. Please note that a material not normally considered a monomer can be a problem in detension arrester.

Calegory 3

(Highly toxic) VCSs for these toxic cargoes cannot use a spill valve or rupture disk as the primary means to meet the overfill protection requirement of 46 CFR 31,20-9. This requirement is in addition to the requirements of Category 1.

(Polymerizes and highly toxic) Must comply with requirements of Categories 1, 2 and 3.

Calegory 4 Calegory 5

(High vepor pressure) VCS pressure drop calculations for cargoes with a vapor pressure greater than 14.7 paie at 115 F must take into account increased vapor-oir mixture densities and vapor growth rates as compared to Category 1 cargoes. Consult the Marine Safety Canter's VCS Guidelines for further information. This requirement is in addition to the requirements of Category 1

Category 6 Category 7 (High vapor pressure and highly toxic) Musi comply with requirements of Categories 1, 3 and 5. (High vapor pressure and polymerizes) Must comply with requirements of Categories 1, 2 and 5.

CODE

The carpo has not heart evaluated/described for use in vapor control systems
