Conditions Of Carriage

THERMAL FLUID HEATER MAY ONLY BE OPERATED WHEN CARRYING GRADE "E" CARGOES.

ONLY THOSE HAZARDOUS CARGOES NAMED IN THE VESSEL'S CARGO AUTHORITY ATTACHMENT, SERIAL #C1-1202856, DATED 05 JUN 2012, MAY BE CARRIED AND THEN ONLY IN THE TANKS INDICATED, SUBJECT TO THE LOADING CONSTRAINTS OF THE VESSEL'S CURRENT STABILITY LETTER.

PER 46 CFR 150.130, THE PERSON IN CHARGE OF THE BARGE IS RESPONSIBLE FOR ENSURING THAT THE COMPATIBILITY REQUIREMENTS OF 46 CFR 150 ARE MET. CARGOES MUST BE CHECKED FOR COMPATIBILITY USING THE FIGURES, TABLES, AND APPENDICES OF 46 CFR 150 IN CONJUNCTION WITH THE REACTIVE GROUP NUMBER FROM THE "COMPATIBILITY GROUP NO." COLUMN LISTED IN THE VESSEL'S CAA.

PER 46 CFR 151.10-15(c)(2) THE MAX TANK WEIGHTS LISTED BELOW REFLECT UNIFORM (WITHIN 5%) LOADING AT THE DEEPEST DRAFT ALLOWED. WHEN CARRYING SUBCHAPER "O" CARGOES AT SHALLOWER DRAFTS. THE BARGE(S) SHOULD ALWAYS BE LOADED UNIFORMLY.

WHEN THE VESSEL IS CARRYING CARGOES CONTAINING GREATER THAN 0.5% BENZENE, THE PERSON IN CHARGE IS RESPONSIBLE FOR ENSURING THE PROVISIONS OF 46 U.S. CODE OF FEDERAL REGUALTIONS PART 197, SUBPART C ARE APPLIED.

THE MAXIMUM DESIGN DENSITY OF CARGO WHICH MAY BE FILLED TO THE TANK TOP IS 8.745 LBS/GAL. CARGOES WITH HIGHER DENSITIES, CARGOES WITH HIGHER DENSITIES UP TO 13.58 LBS/GAL, MAY BE CARRIED AS SLACK LOADS, BUT SHALL NOT EXCEED THE TANK WEIGHT LIMITS AS LISTED BELOW.

IN ACCORDANCE WITH 46 CFR PART 39, EXCLUDING PART 39.4000, THIS VESSEL'S VAPOR CONTROL SYSTEM HAS BEEN INSPECTED TO THE PLANS APPROVED BY MARINE SAFETY CENTER LETTERS SERIAL #C1-1202856 DATED 06 JUN 2012, AND FOUND ACCEPTABLE FOR COLLECTION OF BULK LIQUID CARGO VAPORS

United States of America Department of Homeland Security United States Coast Guard

Certification Date: 17 May 2022 Expiration Date: 17 May 2027

Certificate of Inspection

Vessel Name: KIRBY 28738

ANNOTATED WITH "YES" IN THE CAA'S VCS COLUMN.

IN ACCORDANCE WITH 46 CFR PART 39.1017 AND 39.5000 THIS VESSEL'S VCS HAS BEEN EVALUATED AND APPROVED FOR MULTI-BREASTED TANDEM LOADING WITH OTHER VESSELS SPECIFICALLY BY MARINE SAFETY CENTER LETTER SERIAL #C1-1602921 DATED 10 AUG 2016.

1. Under Environmental Control, Tanks, NR means that the tank group is suitable only for those cargoss which require no environmental control in the cargo tanks,

2. Under Environmental Control, Handling Space, NR means that the tank group is suitable only for those cargoes which require no environmental control in the cargo handling space. NA means that the vessel does not have a cargo control space, and this requirement is not applied.

3. Under Electrical Hazard Class, NA means that the tank group is suitable only for those cargoes which have no electrical hazard class requirement. NR means that the vessel has no electrical equipment located in a hazardous location.

Calegory 6 Catagory ?

The proper shipping name as listed in 46 CFR Table 30.25-1, 46 CFR Table 151.05, and 48 CFR Part 163 Table 2, The three letter designation excigned to the cargo in the Chemical Hazards Response Information System (CHRIS) Manual, Certain subdures of cargoes may not have a CHRIS Code assigned.

The cargo reactive group number assigned for compatibility determinations in 46 CFR Part 150 Tables I and II. In accordance with 46 CFR 150,130, the Person-in-Charge the barge is responsible for ansuring that the compatibility requirements of 46 CFR Part 150 are met. Cargoes must be checked for compatibility using the figures, tables, and appendices of 46 CFR 150 in conjunction with the assigned reactive group number.

Because of the very high reactivity or unusual conditions of carriage or potential compatibility problems, this product is not assigned to a specific group in the Compatibility Chart. For additional compatibility information, contact Commandant (CG-3PSO-3), U.S. Coast Guard, 2100 Second Street, SW, Weshington, DC 20583-

CO11. Telephone (202) 372-1425. See Appandir I to 46 CFR Pert 150 - exceptions to the competability chart.

The subchapter in Title 48 Code of Federal Regulations under which the cargo has been classified.

Those flammable and combustible liquids listed in 46 CFR Table 30.25-1.

Those hazardous cargoes itsted in 46 CFR Table 151.05 and 48 CFR Part 153 Table 2.

Those cargoes listed in 46 CFR Part 153 Table 2 are non-regulated cargoes when carried in bulk on non-occangoing barges.

The cargo classification assigned to each flammable or combustible liquid. Grades inside of "{ }"indicate a provisional assignment based upon literature sources which were not verified by manufacturers date. The Person-in-Charge shell verify the cargo grade based on Manufacturers date and ensure that the barge is authorized for veire not varified by manufacturers data. The Personal Property of the grade of cargo, and defined in 45 CFR 30-10-22.

Combustible Equid cargoes, as defined in 45 CFR 30-10-15.

The Stammability/combustibity grade of these cargoes may very depending upon the Statipoint and Reid vapor pressure. The Person-in-Charge shall verify the cargo grade based on Manufacturers data and ensure that the barge is subholated for carriage of their grade of cargo.

Those subchapter O cargoes which are not destribled as a Stammable or combustible grade of cargo.

No flammability/combustibity grade has been assigned yet, as the necessary Statip point/vepor pressure data for such assignments are presently not available.

The required barge hull classification for carriage of the specified Subchapter O hazardous material cargo, see 46 CFR 151.10-1.

Designed to carry products which require the maximum preventive measures to preclude the uncontrolled release of the cargo. See 45 CFR 151.10-1(b)(1).

Designed to carry products which require significant preventive measures to preclude the uncontrolled release of cargo. See 46 CFR 151.10-1(b)(3).

Designed to carry products of sufficient hazard to require a moderate degree of control. See 46 CFR 161.10-1(b)(4).

Not applicable to barges certificated under Subchapter D.

The vessel's tank group (as defined in Section 4) which is authorized for cardege of the named cargo,

Yes: The vessel's VCS has been reviewed and approved by the MSC to central vapora of the specified cargo, No: The vessel's VCS has been reviewed and is not approved by the MSC to control vapora of the specified cargo.

The vessel's tank group (as defined under the "46 CFR Tank Group Cheracteristics" listed on page 1) which is authorized for carriage of the named corpo.

Yes: The vessel's VCS has been reviewed and approved by the MSC to control vapors of the specified cargo. Not The vessel's VCS has been reviewed and is not approved by the MSC to control vapors of the specified cargo.

The apecified cargo's provisional classification for vapor control systems.

(No additional VCS requirements above those for benzene, gasolines and crude oit) All requirements applying to the handing of oil and hazardous materials in Titles 33 and 45 Code of Federal Regulations (CFR) apply to these cargoes. Those specifically desiring with vepor control systems are in 33 CFR 155,750, 33 CFR 169,120, 33 CFR 158,170, 46 CFR 35,35 and 46 CFR 39. The cargo tank versing system calculations (46 CFR 39.20-11) and the pressure drop calculations (46 CFR 39.30-10)) must use appropriate inction factors, vapor densities and vapor growth rates.

(Polymerizes) Polymerization and residue build-up of these cargoes can adversely affect the vessel by fouting safety components and residuing vepor flow which could lead to cargo tank overpressur/zellon. The vessel's owner must develop a method of ensuring all VCS safety components are functional and polymer build-up is not causing an unsete contilion due to increased pressure in the vapor control piping and cargo tanks. The method shall be acceptable to the local Otition in Chorge, Marine inspection. This is in addition to the requirements of Category 1. Please note that a material not normally considered a monomer can be a problem in detonation

(Highly look) VCSs for these looks cargoes cannot use a spill valve or rupture disk as the primary means to meet the overfill protection requirement of 46 CFR 39.20-9.
This requirement is in addition to the requirements of Calegory 1. (Polymerizes and highly toxic) Must comply with requirements of Categories 1, 2 and 3.

(High vapor pressure) VCS pressure drop estautations for cargoes with a vapor pressure greater than 14.7 psis at 115 F must take into account increased vapor-air mixture densities and vapor growth rates as compared to Category 1 cargoes. Consult the Marine Safety Canter's VCS Guidelines for further information. This requirement is in addition to the requirements of Category 1.

(High vapor pressure and highly todo) Must comply with requirements of Categodian 1, 8 and 6. (Fligh vapor pressure and polymerizes) Must comply with requirements of Categories 1, 2 and 5.

The cargo has not been evaluated/classified for use in vapor control systems.
